1. Introduction

This document is the Pillar III disclosure for the Norinchukin Bank Europe N.V. (hereafter "NBE") and prepared in accordance with the requirements under the REGULATION (EU) No 575/2013. This report should be read in conjunction with our Annual report 2021. With these two reports we fulfil the disclosure requirements as laid down in the CRR (Capital Requirement Regulation) part eight (disclosures by the institution) and additional EBA guidelines.

Our Risk management foundation and approach are described in the Annual report 2021. However, in this Pillar III report we have included these sections which give a concise insight in our risk appetite and serves as background information to better understand the presented disclosures.

All amounts are prepared in thousands of euros (unless stated otherwise), which is NBE's functional and presentation currency. Due to the new disclosure requirements pursuant to CRR2 comparative figures may be absent or differ from the format for last year.

When preparing the information presented in this report we have applied NBE's control framework to guarantee the quality. The templates presented in this report have been reconciled with submitted supervisory reports to DNB such as Corep, Finrep, Encumbered Assets, LCR, NSFR and Leverage ratio.

We have used the official templates and the mapping tool provided by the EBA to prepare the disclosures. Due to the limited number of products and clients, the information that needs to be reported for this reporting period is limited. We do therefore not present the reporting templates with null nature (e.g. empty rows and columns) as those are not applicable for NBE in this document.

NBE started its banking operations in September 2020 with a limited number of products (like repurchase transactions, investments in EU Government bonds and withdrawable at the central bank) and a limited number of clients/counterparties. In 2021 NBE expanded its business with project finance and corporate lending to customers in the exposure class Corporates. The risk profile of NBE was limited as 2020 and 2021 were primarily focused on building up its banking activities.

NBE does not hold any non-performing, forborne and past due exposures at the reporting date. Templates for these kinds of exposures are therefore not presented in this document.

For accounting purposes, a financial instrument is credit-impaired when one or more events that have a detrimental impact on the estimated future cash flows of the financial instrument have occurred since origination or purchase and it is no longer probable that the NBE will be able to collect all principal and interest amounts due in accordance with the contractual terms of the financial instrument.

NBE applies the standardized approach when determining the capital requirements, therefore the IRB (Internal Rating Based) related templates are not applicable for NBE.

Rating agencies that are used by NBE under the Standardized approach include Standard & Poor's, Moody's and Fitch.

To determine the own funds requirements for operational risk NBE applies the Basic indicator approach as laid down in CRR article 315.

There is no difference in the basis of disclosure for prudential purposes and for accounting purposes. NBE has not consolidated any entity as it has no subsidiaries or other entities that fit the consolidation criteria.

Covid-19

In response to the need to address negative economic consequences of the COVID-19 pandemic, the European Union (EU) and Member States have introduced a wide range of mitigating measures to support the real economy and the financial sector. As part of such measures, some Member States have introduced legislative moratoria on loan repayments granting the borrowers various forms of payment holidays on their existing loans. In the other Member States similar measures have been introduced under individual institutions' industry-coordinated initiatives. Many Member States have also introduced various forms of public guarantees to be applied to new lending. These measures had no impact on NBE as we just started our business in September 2020 and have no business that is impacted by the Covid-19 pandemic.

The Russian invasion of Ukraine

The Russian invasion of Ukraine is impacting financial markets; however it has limited impact on NBE's finance and business operations since NBE does not have the related direct exposures. NBE closely monitors the long-term effect of the Russian invasion of Ukraine on macroeconomics, such as higher oil and gas prices, which might affect business condition and credit worthiness of clients/counterparties.

Management Statement

NBE describes Risk Management as "taking necessary measures to adjust risks, i.e., uncertain factors involved in achieving the managerial strategies and business policies, to a permissible level". This objective is stipulated in the NBE's Risk Management Policy. The Risk Appetite Statement (hereafter "RAS") is essential to define the types and amount of risk that NBE is willing to take and considers acceptable in pursuit of its strategic objectives. The RAS identifies the risks related to the business strategy and defines the risk levels NBE is willing to expose itself to into three categories: Capital, Credit & Market Risk (including interest rate risk in banking book), Liquidity & Funding Risk as well as Non-Financial Risk.

Management deems the risk management systems put in place adequate with regard to the institution's profile and strategy.

For the period ended 31 December 2021, the risk profile of NBE was limited as 2021 has been a year to primarily build up its banking activities. NBE started its business in September 2020 with Euro Funding business and commenced F&A Banking business and Structured finance business in 2021 for which its exposure to risk bearing positions was well within the limits of NBE's risk appetite indicators. During 2021 a gradual increase in the loan portfolio occurred, but also well within the pre-defined risk appetite; credit risk has no significant increase. Total shareholder's equity increased in 2020 due to capital contributions from our parent company, and this leaves NBE well capitalised for future expansion. For our Euro funding business with repo and reverse repo all transactions are collateralized with high quality European government bonds and credit risk is well mitigated due to such transactional profile. One of the material risks for NBE is the interest rate risk in banking book, which arises from our investments of capital funds in long maturity fixed income European government bonds and Supranational, sub-sovereign and agencies bonds. The foreign currency risk was not actively taken as growth of financial business assets is funded with the same currency, and NBE has some foreign currency exposure which FX positions are mostly hedged. Liquidity & Funding Risk in NBE is managed within the RAS by monitoring liquidity positions and maintaining good level of highly liquid collateral and cash. As for Non-Financial Risk, the risk profile "reputation risk" is not listed in a material risk category, reputational concerns were taken into consideration when the Risk Universe was constructed. NBE regards reputation damage as a potential secondary effect in the case that any risk materializes.

Overview of key metrics

NBE risk profile and risk positions are sound. Key metrics are well above minimum required levels. However due to the start-up nature of NBE the value of the key metrics will decline but will be well above minimum levels. In the respective sections we will provide a high level analyses of the movements of the key metrics in 2021 (compared to December 2020).

* Comparative figures for 31 March 2021 and 31 December 2020 are not available due to first-time reporting under the CRR2 effective from Q2 2021 reporting.

Risk Exposure Amounts

NBE's Credit Risk Exposure increased predominantly due to the project finance and corporate lending business which started in 2021. Operational Risk remained more or less at the same level as 2020. Counterparty Credit risk is limited and relates entirely to the SFT business (repurchase and reverse repurchase transactions) via a Qualified Central Counterparty.

EU OV1 – Overview of total risk exposure amounts

Consolidation scope

There are no differences between the accounting scope and the scope of prudential consolidation. Therefore, there are no differences between carrying value amounts presented in our Annual Report and the carrying values reported in regulatory scope. NBE has no subsidiaries. Therefore template LI3 is not disclosed. The Accounting scope is presented in our Annual Report in the section Basis for preparation.

The following tables gives insight in the regulatory risk categories and the risk framework.

EU LI1 - Differences between the accounting scope and the scope of prudential consolidation and mapping of financial statement categories with regulatory risk categories 2021

	a	b	c	d	e	f	g
	Carrying values as reported in published financial statements	Carrying values under scope of prudential consolidation	Carrying values of items				
			Subject to the credit risk framework	Subject to the CCR framework	Subject to the securitisation framework	Subject to the market risk framework	Not subject to own funds requirements or subject to deduction from own funds
Breakdown by asset classes according to the balance sheet in the published financial statements

Off balance amounts are weighted with the respective Credit Conversion Factors

NBE Risk management

Introduction

NBE faces a wide range of uncertainties which need to be understood and managed so that NBE can achieve its objectives.

All activities of NBE involve risk: each decision made or action taken incorporates some element of risk and has an impact on NBE's performance (whether safety, financial, operational or reputational). The successful management of this risk, across all divisions and levels, specific functions, projects and activities increases the likelihood that NBE will achieve its strategic objectives. Risk is defined as 'possible occurrence of any event which may produce a negative result to the management of operations (causing some kind of losses)', this definition is aligned with The Norinchukin Bank's definition as defined in the Basic Policies of Risk Management. Uncertainty involving upside (positive) influence must also be included in risk, as per NBE's Risk Management Policy.

The purpose of risk management is described as taking necessary measures to adjust risks to a permissible level. For risk management to be effective, NBE is committed to apply the following principles:

- Every employee at NBE is responsible for the effective management of risk.
- Risk management creates and protects value, and is an essential element of the overall governance of NBE.
- NBE applies risk management consistently and on a systematic basis in all divisions and functions.
- NBE adequately allocates resources to risk management activities.
- NBE ensures that all employees have necessary training, skills and assistance to undertake effective risk management.
- NBE uses the best available information to regularly monitor and report on the status of risk it faces.
- NBE is dynamic, iterative and responsive in its approach to change.
- NBE implements a clear IT infrastructure based on a sound and prudent data quality framework in order to ensure the accuracy and reliability of risk data.

Risk Management Framework and Governance

The Risk Management Framework ("RMF") is established to meet the objective of Risk Management stated above. The RMF is defined as "a set of components that provide the foundations and organizational arrangements for designing, implementing, monitoring, reviewing and continually improving risk management throughout the organization".

The RMF provides a robust and consistent approach to risk management across NBE's organization in order to manage its risk profile in line with its Risk Appetite. It stipulates individual and collective accountabilities for risk management and risk oversight and establishes a common risk language to assign the risks to which NBE is exposed to.

The RMF of NBE is implemented through a "Three Lines of Defence" model in line with industry standards. The model defines clear responsibilities and accountabilities and ensures that effective independent assurance activities take place covering key decisions. For each Line of Defence, NBE applies a systematic approach to assessing risk.

First Line of Defence

The business, the First Line of Defence, has the responsibility for risk decisions, assessing and controlling the risks within their areas of accountability. They are required to establish effective governance and control frameworks for their business to comply with requirements of this policy, to maintain appropriate risk management skills, mechanisms and toolkits and to act within NBE's Risk Appetite parameters.

Second Line of Defence

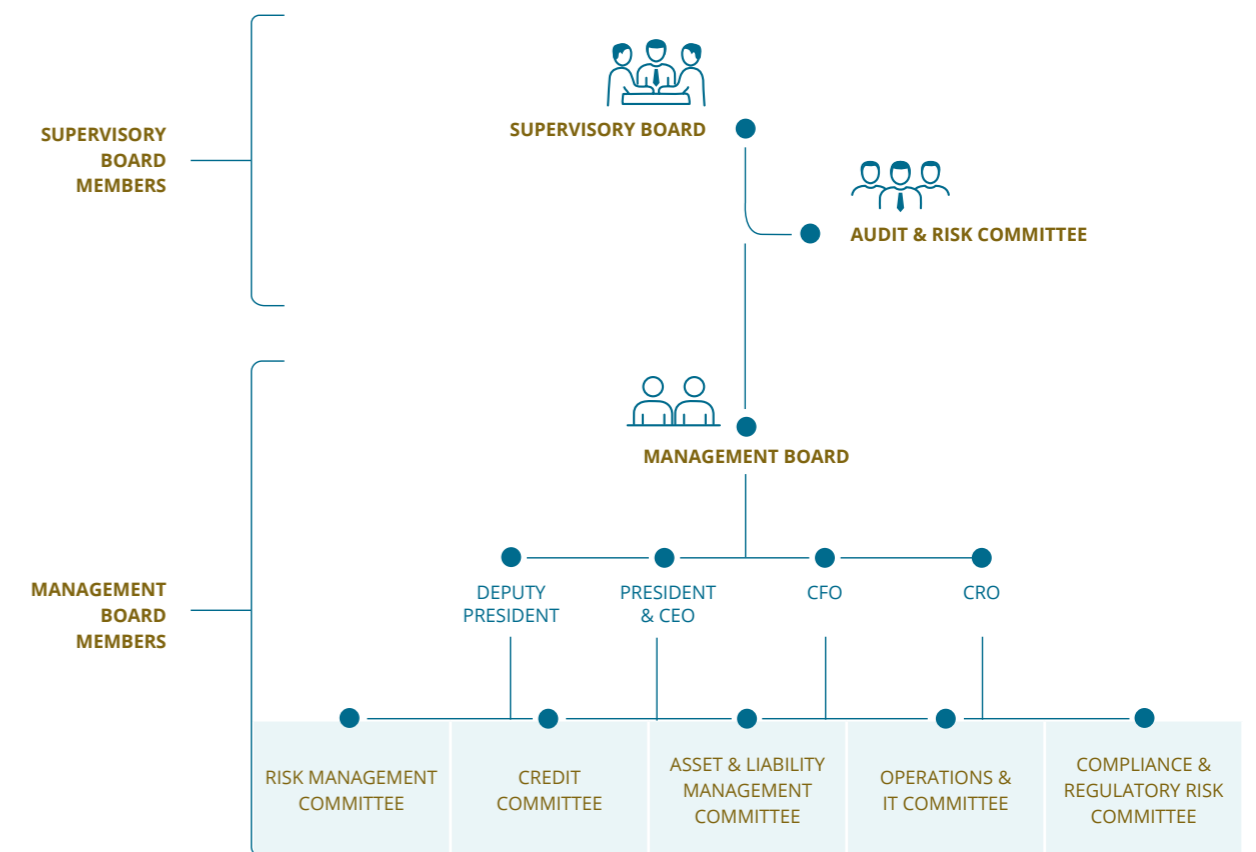

The Risk Management function, a Second Line of Defence section, is a function providing oversight and independent challenge to the effectiveness of risk decisions taken by the business. Additionally, it provides advice and guidance by reviewing, challenging and periodic reporting on the risk profile of NBE. The Compliance function is also considered a Second Line of Defence section and is responsible for defining NBE's policy in line with global and local laws and regulations and oversight and challenge to assure that policies are adhered to. Other functions that are considered second line of defence are: IT security in the IT & Operations Division, and parts of the Finance & Tax Division.

Third Line of Defence

The Internal Audit function, the Third Line of Defence, provides independent and objective assurance of the organization's corporate governance, internal controls, compliance and risk management systems. This assurance task covers all elements of the organization's internal control and risk management system: i.e. risk identification, risk assessment and response to communication of risk related information and thus includes the effectiveness and efficiency of the internal controls in the processes created and performed in the First and Second Line of Defence. The Second Line of Defence and the Third Line of Defence have direct access to the ARC of NBE.

Risk Management Committees

To assist the Supervisory Board to fulfil its responsibilities, the Audit & Risk Committee (ARC) was established. For the Management Board to fulfil its responsibilities, five risk management committees were established to ensure the adequate risk management, namely the Risk Management Committee, the Credit Committee, the Asset and Liability Management Committee, the Operations and IT Management Committee and the Compliance and Regulatory Risk Committee. The outline below depicts the committee structure.

Supervisory Board

The Supervisory Board reviews, evaluates and approves the design and calibration of the RAS at least annually, or more frequently in the event of significant changes in the internal or external environment. The Supervisory Board holds the CEO and other senior management accountable for the RAS. The Supervisory Board ensures that the risk appetite remains consistent with NBE's long-term strategy and that the annual business plans are in line with the approved risk appetite.

Audit and Risk Committee

It is the purpose of the ARC to support the Supervisory Board in its oversight of the policies of the Management Board, particularly with respect to the RMF and control systems, including audit and compliance matters. To that effect it shall prepare the discussion and decision making within the Supervisory Board with respect to these items. The ARC will also assist the Management Board by providing advice related to ensuring the integrity of NBE's Financial Statements, NBE's compliance with legal and regulatory requirements, the external auditor's qualifications and independence and the performance of NBE's Internal Audit function and external auditor.

Management Board

The Management Board is accountable for NBE's Risk Appetite. The Management Board manages the Risk Appetite and the associated RMF & tools and ensures that those tools are embedded into the key business processes. Moreover, the Management Board monitors the evolution of NBE's risk profile to ensure that it remains in line with the RAS that is approved by the Supervisory Board.

Risk Management Committee

This committee has, as its sole and exclusive function, responsibility for the risk management policies of NBE's operations and oversight of the operation of NBE's RMF. The committee will assist the Management Board in fulfilling its oversight responsibilities with regard to the Risk Appetite of NBE, the risk management and compliance framework and the governance structure that supports it. The Risk Management Committee is chaired by the CRO, and composed by the Management Board members and heads of relevant divisions.

Credit Committee

This committee has responsibility for the credit risk management policies of the NBE's operations and oversight of the operation of the NBE's credit risk management framework. The committee will assist the Management Board in fulfilling its oversight responsibilities with regard to the Risk Appetite of NBE, the credit risk management and compliance framework and the governance structure that supports it. The Credit Committee also assesses the individual credit risk taking activities and review credit portfolio including climate-related and environmental risks. The Credit Committee is

chaired by the CRO, and composed by the Management Board members and heads of relevant divisions.

Asset and Liability Management Committee

This committee is mandated to take decisions on the interest rate risk in NBE's Banking Book, currency, liquidity and funding risk profile of NBE within the parameters set by the Management Board. The committee will assist the Management Board by preparing advice on decisions that have impact on the liquidity and funding risk profile of NBE. The committee will advise the Management Board on appropriate measures. The Asset and Liability Management Committee is chaired by the Deputy President, and composed by the Management Board members and heads of relevant divisions.

Operations and IT Management Committee

This committee is mandated to take decisions on operation and IT matters. Responsibilities amongst others are to advise the Management Board on the management of the outsourcing risk, the review of the Business Continuity Plan ("BCP") and the monitoring of operational risk incidents. The Operations and IT Management Committee is chaired by the CFO, and composed by the Management Board members and heads of relevant divisions.

Compliance and Regulatory Risk Committee

This committee will assist the Management Board in its oversight of regulatory, compliance, policy, legal matters and related risks. The committee assists the Management Board and discusses the changes in the regulatory landscape, reviews periodically the Systematic Integrity Risk Analysis ("SIRA") and monitors the progress of the Compliance year plan. The Compliance and Regulatory Risk Committee is chaired by the head of Legal and Compliance Division, and composed by the Management Board members and heads of relevant divisions.

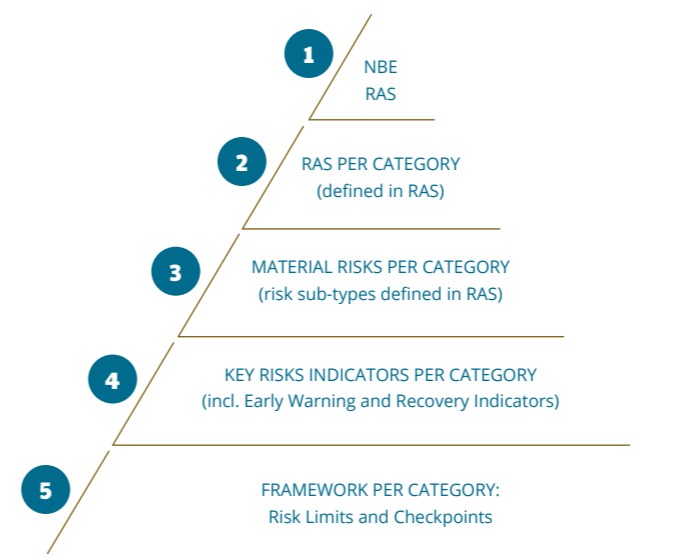

Risk Appetite

NBE aims to maintain a robust financial base in order to ensure stable Euro funding for the parent by constraining its risk-taking activities. The RAS is essential to define the types and amount of risk that NBE is willing to take and considers acceptable in pursuit of its strategic objectives. The RAS describes the consistent approach to risk management. It identifies the risks

related to the business strategy and defines the level of risk NBE is willing to expose itself to. In this manner RAS clarifies NBE to operate its business processes in a controlled environment.

The RAS defines in a qualitative and quantitative manner the level of risk that NBE is willing to take. Therefore the statement includes limit-setting and determines thresholds on the quantitative indicators. The risks are managed in accordance with the limits and thresholds set.

The Risk Management Division monitors the risk positions of NBE against its risk appetite and reports on a periodic basis to the Risk Management Committee. NBE periodically reviews and updates its RAS. The figure below represents the conceptual framework of the RAS. First, the overarching risk appetite for NBE is defined (Dimension 1), followed by RAS for each risk category defined in NBE's Risk Universe (Dimension 2). Statements for each category specify the level of risk that NBE is willing to take.

NBE defines a set of material risk types with corresponding Key Risk Indicators for each risk category (Dimension 3). Key Risk Indicators are measures indicating the development of a certain material risk (Dimension 4). To ensure that the RAS is adhered to, the framework which supports RAS is established (Dimension 5).

As stated above, the RAS is based upon all risk categories in the risk universe. Risk universe is defined as the collection of material risks which could affect NBE achieving its business objectives. In view of its business activities, NBE has identified the following risks as relevant risks in its foreseeable banking operations.

RISK UNIVERSE		
Category 1 Capital, Credit & Market Risk	Strategic Risk	Insufficient Capitalization
	Credit Risk	Credit Concentration Risk
	Interest Rate Risk in the Banking Book	
Category 2 Liquidity & Funding Risk	Cash Flow Risk	Market Liquidity Risk
	Intraday Liquidity Risk	
Category 3 Non-Financial Risk	Process Risk	Business Continuity Risk
	Regulatory Compliance & Integrity Risk	Outsourcing Risk
	Cyber Security Risk	

The risk of not achieving overarching goals and/or profitability targets is considered to remain within appetite as the progress for setting up and enlarging the banking operations according to the business plan is satisfactory.

1

Category 1 – Capital, Credit & Market Risk

In accordance with the risk profile of NBE, the risks identified as material risks in the Capital, Credit and Market Risks Category are listed below:

- *Risk of Excessive Leverage or Insufficient Capitalisation*; risk resulting from low capital levels or high leverage. Not having enough capital to comfortably meet regulatory and internal requirements may require unintended corrective measures to its business plan, including distressed selling of assets which might result in losses or in valuation adjustments to its remaining assets.
- *Strategic Risk*; risk that overarching goals (including sustainable profitability goals), aligned with and supporting the organization's mission are not achieved and sound businesses at NBE is not maintained. Financially, this may entail that volumes decline or margins may shrink, with no opportunity to offset the revenue declines with a reduction in costs.
- *Credit Risk*; risk of losses caused by a decrease in or loss of value of assets (including off-balance sheet assets) due to the deterioration in financial position of borrowers.
- *Credit Concentration Risk*; risk stemming from a large single exposure or group of exposures that are adversely impacted by similar variations in conditions, events, or circumstances.
- *Interest Rate Risk in NBE's Banking Book*; current or prospective risk to both earnings and economic value arising from adverse movements in interest rates that affect interest rate sensitive instruments.

For the period ended 31 December 2021, the risk profile of NBE was limited as 2021 has been a year to primarily build up its banking activities. NBE started its business in September 2020 with Global Investment business and Euro Funding business for which its exposure to risk bearing positions was well within the limits of NBE's risk appetite indicators. During 2021 a gradual increase in the loan portfolio occurred, but also well within the predefined risk appetite.

2

Category 2 – Liquidity & Funding Risk

Liquidity & Funding Risks consist of the following material risks:

- *Cash Flow Risk*; risk of having difficulties securing necessary funds due to a mismatch between investment and funding durations or unexpected cash outflows, the risk of incurring losses by being forced to raise funds at significantly higher funding costs than normal.
- *Market Liquidity Risk*; risk of experiencing losses by not being able to trade in the financial markets due to market turmoil or by being forced to trade under significantly less favourable conditions than normal.
- *Intraday Liquidity Risk*; the risk arising from short-term liquidity risk within a day from payment settlement activities.

For the period ended 31 December 2021, similar to category 1 risks, the risk profile of NBE was limited as 2021 has been a year to primarily build up banking activities. Due to the low and hedged nature of the foreign currency exposures the foreign currency liquidity risk was also very limited and not recognised as a material risk in the risk universe.

Due to the large available liquidity buffers and the still early stage in the build-up of the balance sheet, liquidity and funding risks remained low, as shown by the healthy LCR and NSFR ratios.

For more information on the maturity calendar of NBE's financial assets and liabilities reference is made to Note 27 of the Financial Statements.

3

Category 3 – Non-Financial Risk

The non-financial risk category is broadly defined as those risks not categorized in the category 1 or the category 2 and consists of the following material risks:

- *Process Risk*; risk of loss resulting from inadequate or failed internal processes, people and systems or from external events, and includes legal and data protection risk.
- *Business Continuity Risk*; risk of loss arising from disruption of business or system failures.
- *Outsourcing Risk*; risk of loss from the authorized entity's use of a third party (the "outsourcing service provider") to perform activities that would normally be undertaken by the authorized entity, now or in the future. The supplier may itself be an authorized or unauthorized entity.
- *Cyber Security Risk*; risk of loss related to technical infrastructure or the use of technology within an organization.
- *Regulatory Compliance & Integrity Risk*; threat of damage to reputation, existing or future equity or results of an institution as a result of inadequate compliance with legal requirements covering a broad range of Compliance and Integrity risk topics.

For the period ended 31 December 2021, similar to category 1 and category 2 risks, the risk profile of NBE was limited as 2021 has been a year to primarily build up banking activities, as NBE started its business in September 2020.

It should be noted that, while "reputation risk" is not listed in a material risk category, reputational concerns were taken into consideration when the Risk Universe was constructed. NBE regards reputation damage as a potential secondary effect in the case that any risk materializes. Managing potential reputational effects is therefore considered to be interweaved throughout the RMF.

2. Own Funds

NBE currently has only tier 1 capital and holds no additional tier 1 or tier 2 capital. All shares of NBE are held by the parent company, The Norinchukin Bank. In the table below a breakdown of our CET1 Capital, Risk Weighted Assets and the capital ratios are presented. We have not included template "EU CCA: Main features of regulatory own funds instruments and eligible liabilities instruments" in this report because NBE has only ordinary shares.

Capital adequacy

Our Internal Capital Adequacy Assessment Process (ICAAP) determines the amount of capital needed to ensure a strong capital base which is key for our success. NBE ensures that capital adequacy requirements are met at all times. When determining our capital adequacy we take the future plans (business case) into account and ensure that sufficient capital is available to support our strategy.

NBE applies the standardized approach when determining the capital requirements for credit risk, counterparty credit risk and market risk. For the operational Risk NBE applies the Basic Indicator approach. NBE's CET1 ratio amounts to 415% (2020; 2.496%). The high CET1 ratio reflects the fact that we just started our business. Our CET1 ratio will decline in the future due to the expected growth of our business.

Capital risk

For capital risk, the most important measures are the CET1 ratio, the Total Risk/Internal Capital ratio and Leverage ratio. The shareholder has provided NBE with sufficient capital, leaving NBE well capitalised for future expansion. NBE ensures and monitors the adequacy of the capital and the prudential ratios to meet the regulatory requirements.

EU CC1 - Composition of regulatory own funds

		31-12-2021	31-12-2020	(b)
		Amounts	Amounts	Source based on reference numbers/ letters of the balance sheet under the regulatory scope of consolidation
Common Equity Tier 1 (CET1) capital: instruments and reserves				
1	Capital instruments and the related share premium accounts	2.000.000	2.000.000	CC2 -23
	of which: Instrument type 1			
	of which: Instrument type 2			
	of which: Instrument type 3			
2	Retained earnings	-31.094	-19.064	CC2 - 25
3	Accumulated other comprehensive income (and other reserves)			
EU-3a	Funds for general banking risk			
4	Amount of qualifying items referred to in Article 484 (3) CRR and the related share premium accounts subject to phase out from CET1			
5	Minority interests (amount allowed in consolidated CET1)			
EU-5a	Independently reviewed interim profits net of any foreseeable charge or dividend			
6	Common Equity Tier 1 (CET1) capital before regulatory adjustments	1.968.906	1.980.936	
Common Equity Tier 1 (CET1) capital: regulatory adjustments				
7	Additional value adjustments (negative amount)

3. Leverage ratio

The leverage ratio is a measure that allows for the assessment of institutions' exposure to the risk of excessive leverage. The leverage ratio is calculated as the capital measure divided by the exposure measure (leverage ratio exposure). The leverage ratio of NBE

as per December 31, 2021 (80.6% 2020; 76,4%) is well above the minimum required leverage ratio of 3%. In the following tables the leverage ratio exposure measure, capital measure and several breakdowns are provided.

EU LR1 - LRSum: Summary reconciliation of accounting assets and leverage ratio exposures

		31-12-2021	31-12-2020
		Applicable amount	Applicable amount
1	Total assets as per published financial statements	1.998.404	1.976.038

4. Credit Risk

Credit Risk is described as the possibility that a counterparty in a financial instrument contract will fail to fulfil its commitments according to agreed-upon terms and leading in a financial loss to NBE. Credit risk sources includes counterparty credit risk, concentration risk at different levels, country risk, transaction structure risk, collateral mismatch, and so on.

Credit risk is managed by NBE within the set up rules in its own policy and procedures, which are in line with external regulatory expectations, and where applicable within context of the global internal policies. Credit granting rules, counterparty credit risk, transaction assessment, ceiling approval conditions, credit risk monitoring, consolidated credit risk management, operational flow and processes, etc. are all in place within the context of internal credit risk frameworks.

NBE, as an independent entity, has its own independent risk appetite, credit risk assessment process and credit granting authority body, while it takes into consideration to be aligned with the Norinchukin Bank's consolidated credit risk principles. NBE comprehensively manages credit risk on an entire credit portfolio basis as well as on individual credit basis.

NBE accepts internal credit rating system and model of The Norinchukin Bank, and where applicable endorses these ratings internally. It also acknowledges practices (for project finance loans) from the Norinchukin Bank in the assignment and assessment of internal credit ratings. Each credit rating corresponds to the likelihood that counterparty will fail to fulfil contractual obligations, according to NCK's internal credit rating scheme (i.e. probability of default - PD). Credit risk factors (PD, LGD, and EAD) are used for ECL calculation.

NBE implemented ceiling rules to reduce the chance of credit over-concentration. To prevent over-concentration on credit exposure, total credit exposure for each ceiling segment is monitored on a regular basis. Counterparty ceilings are set for the obligors (project finance on transaction basis) based on their creditworthiness and risk appetite. Project finance ceiling is determined and classified individually according to the degree of their repayment risks, and assessed on transaction basis. Financial institution and corporate ceilings are established in accordance with the assigned internal ratings and exposures are managed within those allocated ceilings. NBE adhere limitation defined in its risk appetite.

Country risk is managed centrally within the Norinchukin Bank's set of guidelines and limits are defined globally. Country ceiling for sovereign exposures may not be set for countries that have advanced and stable economies, and when the highest rating can be assigned. Ceilings are set for sovereign exposures in higher-risk countries in accordance with the sovereign's internal ratings.

Credit Concentration Risk is the risk stemming from a large single exposure or group of exposures that are adversely impacted by similar variations in conditions, events, or circumstances that impact the position of the NBE's risk profile. NBE assesses the overall composition and efficiency of credit portfolios (e.g. sectoral, geographic, rating, climate-related and environmental risks) in addition to single name concentration or group of connected counterparties. Within defined risk appetite threshold limits, credit risk concentration is actively monitored.

The impact of COVID-19 on our credit risk is assessed as limited. Please also see the 'Business developments and Outlook'-paragraph of the Report of the Management Board.

Impairment allowance – Expected credit losses:

NBE aims to maintain sufficient level of reserves to cover its incurred losses. For accounting purposes NBE recognises a loss allowance for expected credit losses on financial assets measured at either amortized cost or (fair value with changes through comprehensive income (FVOCI) and off-balance facilities based on IFRS 9.

All the financial assets and off-balance facilities were classified as Stage 1 as per 31 December 2021 as NBE commenced the banking activities in September 2020 and there has been no significant increase in credit risk since initial recognition. The expected credit loss allowance was booked for debt securities, loans to customers, and off-balance loan commitments as per 31 December 2021 which were all measured at amortized cost. Loans and advances to banks consisted of only of low credit risk and short term instruments (Note 3 of the Financial Statements). Off-balance facilities consisted of the credit facility to The Norinchukin Bank (€3 billion) which was collateralized by the securities borrowed from the parent and loan commitments to customers (Note 22 of the Financial Statements).

Past due assessment

The key considerations for the loan impairment determination are whether any principal or interest payments are past due, or if there are any identified issues in counterparties' cash flows, credit rating downgrades, or breach of the original contract terms. Past-due loans are closely tracked, and default is deemed to occur, among other things, if the obligor is unlikely to pay its credit obligations, without recourse by NBE to actions such as realizing security and/or obligor is past due more than 90 days on any material credit obligation to NBE.

Credit quality

Credit quality of NBE's assets is sound. There are no non-performing, forborne and past due exposures. All exposures are categorized as stage 1.

Credit Risk Mitigation

Offsetting financial instruments

NBE offsets financial assets and financial liabilities in the statement of financial position when there is a legally enforceable right to offset the recognized amounts and when there is an intention to either settle on a net basis, or to realize the assets and settle the liabilities simultaneously. Currently the only financial instruments in scope of offsetting are repurchase transactions (“repos”) and reverse repurchase transactions (“reverse repos”). Counterparties of both repos and reverse repos have the same counterparty (a central clearing institution) after novation.

Collateral

NBE has received collateral for a committed facility (off-balance) to the parent company. The collateral received consists of high quality EUR tradable bonds. For reverse repurchase transaction NBE accepts only high quality European government bonds. The eligibility and value of the collateral is evaluated regularly.

Guarantees

NBE has received a limited amount of guarantees, which relates to corporate lending in the exposure class corporates. NBE has no credit derivatives.

There is no market or credit risk concentrations within the credit risk mitigation taken.

Counterparty Credit Risk

NBE has a limited amount subject to counterparty credit risk and relates entirely to the Securities Financing transactions (SFT) business (repurchase and reverse repurchase transactions via a Qualified Central Counterparty). NBE does not expect that the exposures to the QCCP will increase significantly. Required capital for counterparty credit risk is marginal. Assigning internal capital for credit risk is included in the internal capital adequacy assessment process.

5. Liquidity Risk

Risk Appetite Statement for Liquidity

The liquidity risk appetite of NBE is defined in order to maintain the NBE's business model. It is composed of two sets of statements, qualitative and quantitative, and covers a statement which is applied in extreme stress situations. When NBE changes its business strategy, it updates its liquidity risk appetite, if necessary. With stress testing the robustness and resiliency of the NBE's liquidity adequacy is assessed.

Liquidity Risk Management Strategy

The NBE's liquidity risk management covers the following two risk categories which are in line with the Parent's risk management. As a whole, those risk categories cover European regulatory terms such as the Liquidity risk (adequate liquidity resources for short to medium term) and Funding risk (prudent funding profile for medium to long term).

Cash flow (Funding and liquidity) risk

The risk of having difficulties securing necessary funds due to a mismatch between investment and funding durations or unexpected cash outflows, or the risk of incurring losses by being forced to raise funds at significantly higher funding costs than normal. The cash flow risk includes the short-term liquidity risk within the day (intraday liquidity risk).

Market liquidity risk

The risk of experiencing losses by not being able to trade in the financial markets due to market turmoil or by being forced to trade under significantly less favourable conditions than normal occasions.

Risk Governance for Liquidity Risk Management

Liquidity Risk Management Governance of NBE describes roles and responsibilities of the involved parties of the periodical and continuous liquidity risk management processes.

The Treasury Division is responsible for (1) drafting of the NBE's annual funding plan. In drafting these plans, the Treasury Division collaborates closely with the Treasury & Forex Division of the Parent, which is responsible for drafting its funding plan and contingency liquidity plan. The division is also responsible for (2) the execution of the funding operations in accordance with the approved limits and funding plans, (3) market reviews and (4) communication with trade counterparties.

The Risk Management Division, as the second line of defence, is responsible for monitoring the funding operations and adherence to the approved Risk Appetite Statements, Liquidity Risk indicators and accompanying thresholds. It also is responsible for the annual revision of the contingency liquidity plan. It produces periodical monitoring reports which are reported to the ALM Committee.

The ALM Committee is responsible for review of (1) the annual funding plan and (2) the contingency liquidity plan. The ALM Committee is also responsible for (3) liquidity monitoring and adherence to the liquidity risk appetite, and (4) reviewing liquidity stress testing results.

The Risk Management Committee is responsible for review of the annual revisions of the (1) liquidity risk appetite, (2) liquidity risk management framework, and (3) ILAAP. After the review and discussion the Committee gives a preliminary approval and sends the documents for the final approval to the Management Board and Supervisory Board.

The Management Board is responsible for the approval of (1) funding plan, (2) contingency liquidity plan, (3) liquidity risk appetite, (4) ILAAP and (5) liquidity risk management framework.

The Supervisory Board is informed and ultimately approves the liquidity risk appetite and ILAAP.

The Internal Audit division performs periodical audits on the framework, policies and associated processes with regard to liquidity risk management and provides their conclusions to the Management and Supervisory Board.

Liquidity Risk Management metrics

Key regulatory liquidity metrics that NBE monitors regularly are the Liquidity Coverage Ratio (LCR), the Net Stable Funding Ratio (NSFR) and the survival horizon.

- *Liquidity Coverage Ratio (LCR)* - a regulatory requirement to maintain a buffer of High Quality Liquid Assets (HQLA) against liquidity outflows in a stress scenario over a 30 day period defined by the regulator.
- *Net Stable Funding Ratio (NSFR)* - a regulatory requirement to maintain a stable funding profile in relation to NBE's on- and off-balance sheet activities.
- *Survival horizon* - a regulatory requirement to maintain positive excess liquidity over the horizon of 6 months during assumed stressed circumstances.

Using those indicators, NBE will control short-term cash-flow risk (LCR), structural funding risk (NSFR) and medium-term liquidity (survival horizon)

Contingency Liquidity Plan

The NBE's Contingency Liquidity Plan (CLP) is developed in order to adequately address (un)expected liquidity stress events triggered by internal or external factors. The plan contains:

- a. possible internal and external factors that could lead to a liquidity stress event and may trigger the activation of the CLP,
- b. contingency measures that the NBE could implement in case of a stress event,
- c. local early warning indicators (EWIs) that will be determined in order to identify deteriorating local market circumstances in a timely manner and to decide quickly upon the actions that should be taken by the NBE,
- d. a description of the CLP activation procedure which determines the steps that will be taken to determine and execute the NBE's action plan, and
- e. an annual CLP testing procedure to ensure that the CLP is adequate and funding sources will be available in a stress situation. The plan is consistent with that of the contingency liquidity plan of the Parent.

Liquidity Coverage Ratio

NBE ensures a liquidity position via amongst others sufficient unencumbered High Quality Liquid Assets (liquidity buffer). The liquidity coverage ratio (LCR), which is presented below, is one of the key liquidity metrics NBE uses to manage the liquidity position. The average LCR (2021; 303%) is well above the minimum of 100%. The LCR is predominantly driven by unencumbered High Quality Liquid Assets (liquidity buffer) which consists of level 1 assets (amongst others EU central governments bonds and withdrawable central bank reserves). Furthermore the LCR is driven by credit and liquidity facilities. Since the start of our business, in September 2020, the LCR is well above 100%, as NBE is in the process of building up its business.

12	NSFR derivative liabilities					
13	All other liabilities and capital instruments not included in the above categories		2.822	223	2.553	2.664
14	Total available stable funding (ASF)					1.986.500
Required stable funding (RSF) Items						
15	Total high-quality liquid assets (HQLA)					0
EU-15a	Assets encumbered for a residual maturity of one year or more in a cover pool					
16	Deposits held at other financial institutions for operational purposes					
17	Performing loans and securities:		78.481		198.548	235.548
18	Performing securities financing transactions with financial customers collateralised by Level 1 HQLA subject to 0% haircut		2.807			0
19	Performing securities financing transactions with financial customer collateralised by other assets and loans and advances to financial institutions		2.093		198.548	198.757

		a	b	c	d	e
		Unweighted value by residual maturity				Weighted value
		No maturity	< 6 months	6 months to < 1yr	>= 1yr	
20	Performing loans to non-financial corporate clients, loans to retail and small business customers, and loans to sovereigns, and PSEs, of which:		73.581			36.791
21	With a risk weight of less than or equal to 35% under the Basel II Standardised Approach for credit risk					
22	Performing residential mortgages, of which:					
23	With a risk weight of less than or equal to 35% under the Basel II Standardised Approach for credit risk					
24	Other loans and securities that are not in default and do not qualify as HQLA, including exchange-traded equities and trade finance on-balance sheet products					
25	Interdependent assets					
26	Other assets:		4.061	261	13.981	18.192
27	Physical traded commodities					
28	Assets posted as initial margin for derivative contracts and contributions to default funds of CCPs				2.500	2.125
29	NSFR derivative assets					
30	NSFR derivative liabilities before deduction of variation margin posted					
31	All other assets not included in the above categories		4.061	261	13.981	16.067
32	Off-balance sheet items		3.071.425	78.096	152.435	165.098
33	Total RSF					418.838
34	Net Stable Funding Ratio (%)					474%

The NSFR as per December 31, 2020 amounted to 1241%.

6. Market Risk

The most important market risk is interest rate risk in the banking book (IRRBB). NBE has no trading activities. NBE has marginal foreign currency exposures. Assets in foreign currencies are funded in the respective currency, mitigating the foreign exchange risk. NBE has no Risk Weighted Exposure amounts, therefore template MR1 is not disclosed.

Interest rate risk

Interest rate risk is calculated and IRRBB results are frequently monitored and reported to the Asset and Liability Management Committee. IRRBB is the current or prospective risk to both earnings and economic value arising from adverse movements in interest rates that affect interest rate sensitive instruments.

NBE's entire balance sheet is categorised as a banking book, i.e. the bank does not have any assets which it holds for trading. For 2021, the main components of the interest rate risk in the banking book (IRRBB) are fixed rate security investments. Since NBE commenced its business operations in September 2020, the Bank has built its business with a portfolio of products with short tenor (daily, 1-6 months) and longer tenor (up to 10 years). In the last year the hold to maturity investment portfolio as well as the loan origination increased significantly and as a result of this the cash at central

banks has decreased. NBE does not use derivatives but instead NBE makes use of matched funding to manage the interest rate risk position.

In assessing NBE's exposure to IRRBB, the bank considers two different approaches: changes in Economic Value of Equity (EVE) and changes in Net Interest Income (NII). Δ EVE is a measure of the change in the net-present value of the balance sheet under a range of yield curve stress scenarios. It is a long term measure, assessing the impact over the remaining life of the balance sheet, while changes in expected earnings (i.e. changes in NII). Δ NII is a short-medium term measure, assessing the impact to earnings over a defined time period, in case of NBE this is 1 and 2 years. In accordance with EBA Guidelines (EBA/GL/2018/02), NBE measures its exposure to six standardised yield-curve shocks. Interest rate risk is calculated and IRRBB results are monthly monitored and reported. In line with the EBA Guidelines a floor is applied to the yield-curves. The floors embedded in products pose no risk to NBE and have been assessed as immaterial and are therefore excluded from the calculations.

The following table shows a sensitivity analysis of interest rate risk in relation to equity as well as net interest income.

EU IRRBB1 - Interest rate risks of non-trading book activities

Supervisory shock scenarios		a	b	c	d
		Changes of the economic value of equity		Changes of the net interest income (1 year)	
		31-12-2021	31-12-2020*	31-12-2021	31-12-2020*
1	Parallel up (+200 bps)	-228.176	-51.880	9.270	32.398
2	Parallel down (-200 bps)	102.379	6.949	-1.832	-6.763
3	Steeper	-75.032	-18.779		
4	Flattener	38.935	6.819		
5	Short rates up	-34.863	-6.214		
6	Short rates down	33.224	6.124		

*restated because of application of the floor of the shocks as per EBA guidelines.

7. Operational Risk

To determine the own funds requirements for operational risk NBE applies the Basic indicator approach as laid down in CRR article 315.

EU OR1 - Operational risk own funds requirements and risk-weighted exposure amounts 2021

Banking activities		a	b	c	d	e
		Relevant indicator			Own funds requirements	Risk exposure amount
		Year-3	Year-2	Last year		
1	Banking activities subject to basic indicator approach (BIA)	28.913	15.933	-1.073	3.363	42.043
2	Banking activities subject to standardised (TSA) / alternative standardised (ASA) approaches					
3	Subject to TSA:					
4	Subject to ASA:					
5	Banking activities subject to advanced measurement approaches AMA					

EU OR1 - Operational risk own funds requirements and risk-weighted exposure amounts 2020

Banking activities		a	b	c	d	e
		Relevant indicator			Own funds requirements	Risk exposure amount
		Year-3	Year-2	Last year		
1	Banking activities subject to basic indicator approach (BIA)	30.112	24.851	18.701	3.683	46.040
2	Banking activities subject to standardised (TSA) / alternative standardised (ASA) approaches					
3	Subject to TSA:					
4	Subject to ASA:					
5	Banking activities subject to advanced measurement approaches AMA					

8. Remuneration

The Supervisory Board is responsible for approving, monitoring and maintaining the Remuneration Policy and overseeing its implementation to ensure it is fully operational as intended. The Supervisory Board determines and oversees the remuneration of the members of the Management Board, approves the remuneration of the Head of Internal Audit and oversees the remuneration of the senior officers in control functions, including the Risk Management and Compliance function. The Supervisory Board also approves the remuneration of employees other than the members of the Management Board which is constructed by the Management Board. In 2021 two meetings to oversee or determine the remuneration were held.

The remuneration of NBE consists of two elements: fixed remuneration and variable remuneration.

Fixed remuneration

Fixed remuneration primarily reflects relevant professional experience and organizational responsibility as set out in an employee's job description as part of the terms of employment. The compensation (fixed fee) for members of the Supervisory Board will be determined on the basis of their roles and responsibilities. If a member of the Supervisory Board is also a board member or executive officer of The Norinchukin Bank, no compensation will be paid by NBE. In line with The Norinchukin Bank's rules and/or regulations, this member should only receive compensation from The Norinchukin Bank.

Variable remuneration

Variable remuneration reflects a risk adjusted performance as well as performance in excess of that required to fulfil the employee's job description as part of the terms of employment. At least 50% of the variable remuneration is based on non-financial performance criteria such as strategic goals, customer satisfaction, leadership, management skills, compliance with the Risk Management Policy of NBE, creativity and motivation. While financial performance criteria, such as NBE's financial/business results, is a part of the performance assessment, non-financial performance criteria would form a large part of the performance assessment in order to not incentivise excessive risk taking and to contribute to NBE's long term business continuity.

Bonus Cap

NBE establishes appropriate ratios between the fixed and the variable component of the total remuneration, whereby the following principles apply:

- The variable component shall not exceed 20% of the fixed component of the total remuneration for each employee in principle.
- If the remuneration for an employee does not or not entirely follow the Collective Labor Agreement ("CLA") Banks standards, its variable component is not capped at 20% of the fixed component of the total remuneration for each employee. However, it is capped at 100% of the fixed component, provided that in any case, NBE's total variable component for employees concerned shall not exceed 20% of the total fixed component of NBE's total remuneration.

EU REM1 - Remuneration awarded for the financial year 2021

		a	b	c	d

EU REMA - Remuneration policy

QUALITATIVE DISCLOSURES

Information relating to the bodies that oversee remuneration. Disclosures shall include:

The remuneration of other Employees than the members of the Management Board shall be proposed by the Management Board, taking into account all relevant criteria pursuant to this Remuneration Policy and, having regard of the input from the function holders referred to in paragraph 4.3 below, submitted for approval to the Supervisory Board.

Risk Management function and Compliance function will provide effective input in accordance with their roles into the setting of bonus pools, performance criteria and remuneration awards where those functions have concerns regarding the impact on Employees behaviour and the riskiness of the business undertaken.

The Risk Management function will assist with and inform on the definition of suitable risk adjusted performance measures (including ex post adjustments), as well as with assessing how the variable remuneration structure affects the risk profile and culture of the Bank. The Risk Management function will validate and assess risk adjustment data.

The Compliance function should analyse how the Remuneration Policy affects the Bank's compliance with legislation, regulations, internal policies and risk culture and should report all identified compliance risks and issues of non-compliance to the Management Board and Supervisory Board. The findings of the Compliance function should be taken into account by the Supervisory Board during the approval, review procedures and oversight of the Remuneration Policy.

The Internal Audit division should carry out an independent review of the design, implementation and effects of the Remuneration Policy on the risk profile of the Bank and the way these effects are managed.

The Human Resources function should participate in and inform on the design and the evaluation of the Remuneration Policy for the Bank, including the remuneration structure, the aspect of gender neutrality, remuneration levels and incentive schemes, in a way that would not only attract and retain Employees within the Bank's needs but also ensure that the Remuneration Policy is aligned with the Bank's risk profile.

Information relating to the design and structure of the remuneration system for identified staff. Disclosures shall include:

The Bank has Identified Staff whose professional activities have a material impact on the Bank's risk profile and to whom specific requirements apply as follows. The variable remuneration for Identified Staff is in principle capped at 10% of the fixed annual remuneration to the extent that its remuneration entirely follows CLA Banks standards. In any case, the variable remuneration for Identified Staff is capped at 100% of the fixed annual remuneration.

The gender-neutral fixed remuneration of Identified Staff (which includes MB members) reflects their professional experience and organisational responsibility taking into account the level of education, the degree of seniority, the level of expertise and skills, the constraints (e.g. social, economic, cultural or other relevant factors) and job experience, the relevant business activity. To ensure alignment of the total remuneration with market practice, a salary scale system is utilized and the proposed grading and remuneration level is benchmarked via an external consultancy firm.

The remuneration for an expatriate employee, who is employed by the parent bank (The Norinchukin Bank, the sole shareholder of the Bank), is based on the salary-scale system as is used by the parent bank pursuant to the parent bank's policy, provided that, for remuneration regarding his or her activities for the Bank, this Remuneration Policy will apply as well. For expatriate employees a secondment contract with the parent is established that agrees what costs are born by NBE.

Employees in internal control functions will be independent and have sufficient resources, knowledge and experience to perform their tasks and will have sufficient authority. They will be remunerated on the basis of the achievement of the objectives of their function, independent of the results of the business activities they supervise.

Before paying out the variable remuneration, an assessment of the performance and, if necessary, an ex post risk adjustment will be applied to align variable remuneration to additional risks that have been identified or materialised.

Variable remuneration shall only be paid out or vest, as applicable, if this is sustainable given the financial situation of the Bank and if the performance of the Bank, the business unit and the relevant Employee justifies payment of variable remuneration.

QUALITATIVE DISCLOSURES

Description of the ways in which the institution seeks to link performance during a performance measurement period with levels of remuneration. Disclosures shall include:

The Bank will set appropriate performance measurements to evaluate Employees' individual performances. Annual salary increases will be based on the result of individual performance evaluations. The assessment is completed on an individual by individual basis and is supported with a comprehensive company-wide process under which risk and performance related events are identified and assessed, whereby all relevant facts and circumstances are investigated and adjustments to performance assessments and/or the remuneration itself are made as appropriate. The Bank will use performance rating scales for the individual performance evaluations and increment in annual salary increases for each Employee are based on his/her rating scale.

Description of the ways in which the institution seeks to adjust remuneration to take account of long term performance. Disclosures shall include:

The Bank is entitled to reclaim remuneration in whole or in part insofar as the payment has been made on the basis of incorrect information about the achievement of the targets underlying the remuneration. The reclaim may also be filed on behalf of the Bank by the Supervisory Board or by a representative appointed by the shareholders meeting.

The Bank will reduce or reclaim the amount of a variable remuneration awarded to a natural person under its responsibility in case of:

- Fraud or other conduct with intent or severe negligence which led to significant losses to the Bank or;
- Failure to meet appropriate standards of suitability and integrity.

The description of the main parameters and rationale for any variable components scheme and any other non-cash benefit in accordance with point (f) of Article 450(1) CRR. Disclosures shall include:

Where remuneration is performance related, the total amount of remuneration is based on a combination of the assessment of the performance of the individual and of the business unit concerned and of the overall results of the Bank. When assessing individual performance, financial and non-financial criteria are taken into account. Individual performance criteria is based on the Employee's job description and would be set out in an individual annual performance target.

At least 50% of the variable remuneration is based on non-financial performance criteria such as strategic goals, customer satisfaction, leadership, management skills, compliance with the Risk Management Policy of the Bank, creativity and motivation. While financial performance criteria, such as the Bank's financial/business results, is a part of the performance assessment, non-financial performance criteria would make up a large part of the performance assessment in the light of the notion that the performance criteria should not incentivise excessive risk taking and therefore should contribute to the Bank's long term business continuity.

The Bank will set the appropriate ratios between the fixed and the variable component of the total remuneration, whereby the following principles apply:

- The variable component shall not exceed 20% of the fixed component of the total remuneration for each Employee in principle.
- If the remuneration for an Employee does not or not entirely follow Collective Labor Agreement (CLA) Banks standards, its variable component is not capped at 20% of the fixed component of the total remuneration for each Employee, however, it is capped at 100% of the fixed component, provided that in any case, the Bank's total variable component for Employees concerned shall not exceed 20% of the total fixed component of the Bank's total remuneration.

The allocation of variable remuneration will be related to the Bank's long-term objectives.

The Bank will ensure that Employees will not to use personal hedging strategies or remuneration- and liability- related insurances to undermine the risk alignment effects as embedded in the remuneration arrangements.

9. Appendix: Disclosure index

Overview of pillar III templates including which are applicable and which not. Qualitative templates/tables are not presented separately but are included in the narratives, except for template REMA Remuneration policy.

DISCLOSURE INDEX

EU LIQ1 - Quantitative information of LCR	Yes	Section Liquidity Risk	No
EU LIQB on qualitative information on LCR, which complements template EU LIQ1	Yes	Section Liquidity Risk	Yes
EU LIQ2: Net Stable Funding Ratio	Yes	Section Liquidity Risk	No
EU CRA: General qualitative information about credit risk	Yes	Section Credit Risk	Yes
EU CRB: Additional disclosure related to the credit quality of assets	Yes	Section Credit Risk	Yes
EU CR1: Performing and non-performing exposures and related provisions	Yes	Section Credit Risk	No
EU CR1-A: Maturity of exposures	Yes	Section Credit Risk	No
EU CR2: Changes in the stock of non-performing loans and advances	Yes	Section Credit Risk	No
EU CR2a: Changes in the stock of non-performing loans and advances and related net accumulated recoveries	Yes	Section Credit Risk	No
EU CQ1: Credit quality of forborne exposures	Yes	Section Credit Risk	No
EU CQ2: Quality of forbearance	Yes	Section Credit Risk	No
EU CQ3: Credit quality of performing and non-performing exposures by past due days	Yes	Section Credit Risk	No
EU CQ4: Quality of non-performing exposures by geography	Yes	Section Credit Risk	No
EU CQ5: Credit quality of loans and advances by industry	Yes	Section Credit Risk	No
EU CQ6: Collateral valuation - loans and advances	Yes	Section Credit Risk	No
EU CQ7: Collateral obtained by taking possession and execution processes	Yes	Section Credit Risk	No
EU CQ8: Collateral obtained by taking possession and execution processes – vintage breakdown	Yes	Section Credit Risk	No
EU CRC – Qualitative disclosure requirements related to CRM techniques	Yes	Section Credit Risk	Yes
EU CR3 – CRM techniques overview: Disclosure of the use of credit risk mitigation techniques	Yes	Section Credit Risk	No
EU CRD – Qualitative disclosure requirements related to standardised model	Yes	Section Credit Risk	Yes

DISCLOSURE INDEX			
NAME OF TEMPLATE	Applicable	Disclosed in the Pillar III report	Qualitative
EU CR4 – standardised approach – Credit risk exposure and CRM effects	Yes	Section Credit Risk	No
EU CR5 – standardised approach	Yes	Section Credit Risk	No
EU CRE – Qualitative disclosure requirements related to IRB approach	No	NBE applies the standardized approach	Yes
EU CR6 – IRB approach – Credit risk exposures by exposure class and PD range	No	NBE applies the standardized approach	Na
EU CR6-A – Scope of the use of IRB and SA approaches	No	NBE applies the standardized approach	Na
EU CR7 – IRB approach – Effect on the RWEAs of credit derivatives used as CRM techniques	No	NBE applies the standardized approach	Na
EU CR7-A – IRB approach – Disclosure of the extent of the use of CRM techniques	No	NBE applies the standardized approach	Na
EU CR8 – RWEA flow statements of credit risk exposures under the IRB approach	No	NBE applies the standardized approach	Na
EU CR9 –IRB approach – Back-testing of PD per exposure class (fixed PD scale)	No	NBE applies the standardized approach	Na
EU CR9.1 –IRB approach – Back-testing of PD per exposure class (only for PD estimates according to point (f) of Article 180(1) CRR)	No	NBE applies the standardized approach	Na
EU CR10 – Specialised lending and equity exposures under the simple riskweighted approach	No	NBE applies the standardized approach	Na
EU CCRA – Qualitative disclosure related to CCR	Yes	Section Counterparty Credit Risk	Yes
EU CCR1 – Analysis of CCR exposure by approach	Yes	Section Counterparty Credit Risk	No
EU CCR2 – Transactions subject to own funds requirements for CVA risk	No	NBE has no CVA Risk	Na
EU CCR3 – Standardised approach – CCR exposures by regulatory exposure class and risk weights	Yes	Section Counterparty Credit Risk	No
EU CCR4 – IRB approach – CCR exposures by exposure class and PD scale	No	NBE applies the standardized approach	Na
EU CCR5 – Composition of collateral for CCR exposures	Yes	Section Counterparty Credit Risk	No
EU CCR6 – Credit derivatives exposures	No	NBE has no such exposures	Na
EU CCR7 – RWEA flow statements of CCR exposures under the IMM	No	NBE applies the standardized approach	Na
EU CCR8 – Exposures to CCPs	Yes	Section Counterparty Credit Risk	No
EU-SECA - Qualitative disclosure requirements related to securitisation exposures	No	NBE has no such exposures	Na
EU-SEC1 - Securitisation exposures in the non-trading book	No	NBE has no such exposures	Na
EU-SEC2 - Securitisation exposures in the trading book	No	NBE has no such exposures	Na
EU-SEC3 - Securitisation exposures in the non-trading book and associated regulatory capital requirements - institution acting as originator or as sponsor	No	NBE has no such exposures	Na

DISCLOSURE INDEX			
NAME OF TEMPLATE	Applicable	Disclosed in the Pillar III report	Qualitative
EU-SEC4 - Securitisation exposures in the non-trading book and associated regulatory capital requirements - institution acting as investor	No	NBE has no such exposures	Na
EU-SEC5 - Exposures securitised by the institution - Exposures in default and specific credit risk adjustments	No	NBE has no such exposures	Na
EU MRA: Qualitative disclosure requirements related to market risk	Yes	Section Market Risk	Yes
EU MR1 - Market risk under the standardised approach	Yes	Section Market Risk	No
EU MRB: Qualitative disclosure requirements for institutions using the internal Market Risk Models	No	NBE applies the standardized approach	Na
EU MR2-A - Market risk under the internal Model Approach (IMA)	No	NBE applies the standardized approach	Na
EU MR2-B - RWA flow statements of market risk exposures under the IMA	No	NBE applies the standardized approach	Na
EU MR3 - IMA values for trading portfolios	No	NBE applies the standardized approach	Na
EU MR4 - Comparison of VaR estimates with gains/losses	No	NBE applies the standardized approach	Na
EU ORA - Qualitative information on operational risk	Yes	Section 7 Operational Risk	Yes
EU OR1 - Operational risk own funds requirements and risk-weighted exposure amounts	Yes	Section 7 Operational Risk	No
EU REMA - Remuneration policy	Yes	Section 8 Remuneration	Yes
EU REM1 - Remuneration awarded for the financial year	Yes	Section 8 Remuneration	No
EU REM2 - Special payments to staff whose professional activities have a material impact on institutions' risk profile (identified staff)	Yes	Section 8 Remuneration	No
EU REM3 - Deferred remuneration	Yes	Section 8 Remuneration	No
EU REM4 - Remuneration of 1 million EUR or more per year	Yes	Section 8 Remuneration	No
EU REM5 - Information on remuneration of staff whose professional activities have a material impact on institutions' risk profile (identified staff)	Yes	Section 8 Remuneration	No
EU AE1 - Encumbered and unencumbered assets	Yes	Section Liquidity Risk	No
EU AE2 - Collateral received and own debt securities issued	Yes	Section Liquidity Risk	No
EU AE3 - Sources of encumbrance	Yes	Section Liquidity Risk	No
EU AE4 - Accompanying narrative information	Yes	Section Liquidity Risk	Yes
EU IRRBB1 - Interest rate risks of non-trading book activities	Yes	Section Market Risk	No
EU IRRBBA - Qualitative information on interest rate risks of non-trading book activities	Yes	Section Market Risk	Yes

Dedicated
to **sustaining**
all life.
